

Recycle your old PC.

Help us help schools in the Philippines

If you have any old PC equipment you do not need anymore, then please consider donating it to our project that recycles computers and places them in schools where the children have nothing at all.

Your old PC or laptop will be checked, all personal data removed and the computer reformatted before being packed and shipped to its new home as a classroom computer.

we are looking for 300 in total and will take any computer equipment and reference books. Your kind donations will help us help thousands of young people to gain real life education and a chance for a better life.
